Anonymous Functions

- Also called Closures
- Create and given a name at the same time the code is executed.
- Normally Functions are seen first.
- “Hoisting”

Anonymous Functions

```
var functionName =function() {  
    //code the function runs  
}
```

A green speech bubble with a black outline and a tail pointing towards the code. It contains the text 'function definition' in white.

function
definition

Anonymous Functions

```
var functionName =function() {  
    //code the function runs  
}
```

A green speech bubble with a black outline and a tail pointing towards the bottom-left. It contains the text 'function call' in white.

function
call

```
functionName();
```
